

AQUA ALGICIDE

DESCRIPTION

Aqua Algicide is an effective treatment that will help eliminate algae and keep your pool crystal clear all year round. Used during the swimming season this will extend the algicidal properties of chlorine sanitisers. It should be noted that this product is compatible with all pool sanitising products. During the non-swimming and winter months, Aqua Algicide can be used as an effective pool winteriser. Aqua Algicide provides an economic and labour saving method of ensuring pools remain free of algae through these non-use periods and promotes easier start-up for the swimming season.

Active Ingredient: Alkyl Dimethyl Benzyl Ammonium Chloride 25% w/w

DIRECTIONS FOR USE

SWIMMING SEASON

Add Pool Pride Algicide to your pool every six weeks to boost algae inhibiting properties of pool pride chlorine sanitisers. Dilute using the rates shown in the table below:

Pool Size - Litres	Initial Chlorine Shock Dose - Pool Pride Granules	Add Pool Pride Algicide every 6 weeks	
		Swimming Season	Non swimming Season
10,000	200 grams	100 mls	200 mls
30,000	600 grams	300 mls	600 mls
50,000	1000 grams	500 mls	1000 mls
80,000	1600 grams	800 mls	1600 mls
100,000	2000 grams	1000 mls	2000 mls

NON SWIMMING SEASON (Winterising)

- Step 1** Vacuum pool and backwash filter
- Step 2** Add an initial shock dose of Pool Pride granular chlorine at the rate of 200gms/10,000 l. (Refer to table) Allow pool to de-chlorinate until free chlorine level is between 1 - 2 ppm.
- Step 3** Pour Pool Pride Algicide around the edges of the pool and re-circulate pool water to ensure uniform distribution. Continue to add Pool Pride Algicide every 6 weeks at the rate shown for the non-swimming season. Do not repeat the shock dose treatment. For best results it is recommended you cover your pool during the non-swimming season. To return your pool to normal chlorination for the swimming season refer to the Pool Pride 5 Step Water Balancing and Chlorination programme.
