

CircleClear

The Complete Pool Water Management System

Conserve water, the world's most valuable resource!

Pool Water TDS Control

Ever wondered why the pool water quality goes "off" even though disinfectant concentrations and water balance is correct. You scratch your head and someone suggests that it must be the filter. You then backwash the filter and find magically that the water quality improves. The truth is that the filter wasn't the culprit. By backwashing, some of the "bad" water had been replaced with mains water of lower TDS. Thus, the TDS cycle is exposed. Unless TDS is controlled, pool water quality is out of control. The CircleClear system automatically monitors and controls pool water TDS so you don't have to worry about it. You'll only backwash the filter to get rid of the dirt in the filter bed, not to correct deteriorating water quality.

Recycle Backwash Water Irrigation

The CircleClear system collects and treats backwash water to a standard suitable for irrigation of parks and playing fields. Previously wasted water can now be put to good use, saving money and the environment.

Pool Filling

Further treatment will allow this water to be used for pool filling. Water quality more than conforms to WHO, NHMRC and health department requirements. Save on mains water consumption by managing the pool water cycle.

Regulatory Approvals

The ProMinent CircleClear system comes complete with all the site specific regulatory approvals required to operate the system. You won't be stuck with only half a solution, the CircleClear system is the complete package.

Only the best from ProMinent

ProMinent is renowned throughout the world for the highest standard of equipment in quality, engineering, reliability and performance. ProMinent Australia has its head office in Sydney with fully supported branches in Brisbane and Melbourne and authorised distributors in all other States and regional areas of Australia and NZ. Any CircleClear system installed in Australia will be fully supported by ProMinent.

Accredited Service Technicians

ProMinent has appointed accredited service technicians to provide service of the CircleClear system. You can be assured that our accredited people are fully trained to maximise the life of your system.

Accredited Installers

ProMinent has appointed accredited installers to ensure the integrity of every installation. We want every system to work to perfection.
